

ALGORITHM 33

FACTORIAL

M. F. LIPP

RCA Digital Computation and Simulation Group,  
Moorestown, New Jersey

```
real procedure Factorial (n) ;  
    value n ; integer n ;  
comment This procedure makes use of the implicitly defined  
    recursive property of Algol to compute n!;  
begin Factorial := if n = 0 then 1. else n × Factorial (n-1)  
end
```
